Home > Failed states

“Under international law, a State is an entity that has a defined territory and a permanent population, under the control of its own government, and that engages in, or has the capacity to engage in, formal relations with other such entities. A State becomes failed when the third constitutive element of statehood, a government in effective control, fades away.”

OUTLINE

Chapter 2, Application of IHL by and in Failed States ^[1]

Chapter 5, Situations where structures of authority have disintegrated ^[2]

DOCUMENT
