Medical objects are composed of:

**Medical material**
All the equipment and supplies necessary for the functioning of medical units.

**Medical ships and craft**
Any medical transport by water

**Medical transport and transportation**
Any means of transportation, whether military or civilian, permanent or temporary, assigned exclusively to medical transportation and under the control of a competent authority. It may be a medical vehicle, a medical ship or craft, or a medical aircraft [1]. Medical transports are protected by international law and may bear the distinctive emblem [2] prescribed for that purpose.
Medical transportation means the conveyance by land, water or air of the wounded, sick [3] and shipwrecked [4], medical [5] and religious personnel [6] and medical material.

**Medical unit**
A military or civilian establishment or other unit organized for medical purposes, namely the search for, collection, transportation, diagnosis or treatment – including first-aid treatment – of the wounded, sick [3] and shipwrecked [4], or for the prevention of disease.
Medical units include hospitals and other similar units, blood transfusion centres, preventive medicine centres and institutes, and the medical and pharmaceutical stores of such units. Medical units may be fixed or mobile, permanent or temporary.

**Medical vehicle**

Any medical transport (i.e. means of medical transportation) by land.
